

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 18, 2000 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Lightning ignited several new large range fires in the Great Basin and Northwest Areas, and caused heavy initial attack activity in Nevada, Utah and southern Idaho. A Type I Incident Management Team was mobilized to a fire in Nevada. Crews continued to make good progress on the timber fires in Idaho and Montana, aided by cloud cover and scattered precipitation. Dry lightning is forecast today in eastern Oregon and northern Nevada. Aircraft, crew, equipment and overhead mobilization through the National Interagency Coordination Center increased. Very high to extreme fire danger indices were reported in Oregon, Washington, California, Idaho, Montana, Utah, Nevada, Arizona, Colorado, and Wyoming.

EASTERN GREAT BASIN AREA LARGE FIRES:

CLEAR CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Carvalho) is assigned. This fire is northwest of Salmon, ID. One residence and five outbuildings have been destroyed. Ten residences are threatened. Extremely steep terrain and limited access are challenging containment efforts. Anchor points are difficult to establish. Active weather cells and gusty winds yesterday afternoon increased fire activity.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Hefner) is assigned. The fire is 27 miles north of McCall, ID. The fire was moderately active yesterday and continued to burn actively all night. The southeast edge of the fire is threatening Warren Wagon Road and the community of Secesh. A precautionary evacuation of War Eagle Lookout is planned.

FENSTER CREEK, Salmon-Challis National Forest. A Type II Incident Management Team (Saleen) will transition with a Type I Incident Management Team (Bennett) today. This fire is four miles north of Salmon, ID. Crews have been able to direct- attack the fire on all divisions and have made significant progress. Current threats are to residences, historic cabins, mine outbuildings, and the Salmon municipal watershed.

BARE CANYON, Targhee National Forest. This timber fire is 32 miles west of Dubois, ID. The fire received some scattered precipitation yesterday, which has aided control efforts and kept fire activity minimal.

SOUTH ROSE RANCH, Northwest Utah State. This lightning-caused fire is 50 miles northwest of Logan, UT. The fire is burning in grass, cedar, pinyon pine and juniper. Strong, shifting winds caused extreme fire behavior. Ranches, powerlines and fences are threatened.

MOLLYS, Northwest Utah State. This fire is burning in grass, sagebrush, pinyon pine and juniper 15 miles west of Salt Lake City. A ranch is threatened. The fire made small runs with some torching.

MP 63 I-84, Lower Snake River District, BLM. This fire is 12 miles

southeast of Boise, ID, north of Interstate 84 in open rangeland. There are structures in front of the fire, but they are not immediately threatened. The fire has potential to grow significantly.

DAYTON, Upper Snake River District, Eastern Idaho Area, BLM. The fire is burning on state and private lands 14 miles east of Malad, ID. Strong winds are hampering containment efforts.

MP 77 I-84, Lower Snake River District, BLM. This fire is 22 miles southeast of Boise, ID. Seven structures, a gas pipeline and several outbuildings were successfully protected by engine crews.

BIRCH CREEK 2, Upper Snake River District, South-Central Idaho Area, BLM. This fire was ignited by lightning six miles southeast of Oakley, ID. No new information was reported.

WESTERN GREAT BASIN AREA LARGE FIRES:

PRINCE ROYAL, Winnemucca Field Office, BLM. A Type II Incident Management Team (Suwyn) is assigned. This fire is burning in grass and sagebrush three miles south of Imlay, NV. The fire jumped Highway 400 last night and is threatening the towns of Imlay and Unionville. Observed fire behavior includes spotting and fire whirls. Five structures were saved during initial attack.

BILK CREEK COMPLEX, Winnemucca Field Office, BLM. A Type I Incident Management Team (Hutchison) has been ordered. The fires are burning in grass and sagebrush 50 miles north of Winnemucca, NV. Fires in the complex include Dry Creek, Cherry Creek, Riverside, Double H, Garden Springs, and Willow Creek. Strong, erratic winds caused extreme rates of spread and intense fire behavior. Powerlines were reported destroyed, and a communications tower and several ranches are threatened.

GREGG CANYON, Winnemucca Field Office, BLM. This fire is burning 25 miles southeast of Winnemucca, NV. Current threats are to horses, wildlife habitat and rangeland.

BIG SPRINGS, Elko Field Office, BLM. This fire is 26 miles southeast of Wells, NV. The fire is making a wind-driven run through grass, sagebrush,

pinyon pine and juniper fuels. It is burning toward an alkali flat. Crews plan to flank the fire once it reaches the sparse fuels on the flat.

PUMPERNICKEL, Winnemucca Field Office, BLM. The fire is burning in grass and sagebrush 30 miles southeast of Winnemucca, NV. Strong winds and steep terrain are challenging containment efforts.

CHERRY, Ely Field Office, BLM. A Type II Incident Management Team (Murphy) is assigned. The fire is burning in dense pinyon pine, juniper, white fir, and mountain mahogany 30 miles northwest of Ely, NV. Rolling debris on steep slopes is causing spotting problems. Crews are engaged in extensive mopup of the 1000 hour fuels.

NORTHERN ROCKIES AREA LARGE FIRES:

A Type II Incident Management Team (Swope) is assigned to a staging area in Missoula, MT.

LITTLE BLUE, Bitterroot National Forest. A Type I Incident Management Team (Frye) is assigned. This fire is 25 miles southwest of Darby, MT. The west half of the fire is rugged and lacking good access. A persistent inversion is limiting air support. Crews are having difficulty securing anchor points.

SEELEY COMPLEX, Lolo National Forest. A Type II Incident Management Team (Corbin) is assigned. These fires are 34 miles northeast of Missoula in the Seeley Lakes area. The complex is made up of about 30 lightning-caused fires including the Upper Monture, Fenn Mountain, McCabe, #6, and Morrell fires. Two new fires were reported yesterday. Fire behavior during the burning period is increasing in intensity each day.

CLEARWATER COMPLEX. Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type II Incident Management Team (Specht) is assigned. These fires are 40 miles east of Missoula, MT. The complex consists of approximately 38 fires ranging from one tenth of an acre to 90 acres. Only seven of the fires are still staffed, and the rest are in patrol status. This complex is sharing resources with the Seeley Complex.

EAGLE POINT, Bitterroot National Forest. This fire is 15 miles northeast of Hamilton, MT and is burning in a steep, heavily timbered area which is inaccessible by road. No new information was reported.

SOUTHERN AREA LARGE FIRES:

SHELBY, Alabama State Forestry Commission. This lightning-caused fire is 25 miles southeast of Birmingham, AL. Suppression operations are hindered by extreme drought conditions, strong winds, high temperatures, and low relative humidity. Parts of the fire are in steep, rocky terrain.

CASA LOMA, Eglin Air Force Base. This fire is one of several arson fires burning near Niceville, FL. A Type I helicopter is assisting with suppression efforts due to urban interface involvement within the incident.

OUTLOOK:

*** A RED FLAG WARNING IS POSTED IN SOUTHEASTERN OREGON AND NORTHERN AND CENTRAL NEVADA FOR DRY LIGHTNING THIS AFTERNOON ***

Monsoon moisture is moving northward from the southwest and will produce scattered high-based dry thunderstorms over the central and northern Great Basin and interior northwest today. Lower level dryness and above normal temperatures will keep the fire danger high.

Eastern Oregon, eastern Washington, Idaho, and Nevada will be partly to mostly cloudy with a chance of afternoon dry thunderstorms. High temperatures should be in the mid 80's to mid 90's in the valleys and in the upper 70's and 80's in the mountains. Winds will be southwest to northwest at 5 to 15 mph. Winds will be gusty around thunderstorms. Minimum relative humidities will range from 10 to 25 percent.

Montana and Wyoming will be partly to mostly cloudy with scattered showers and thunderstorms. High temperatures will be in the mid 80's to lower 90's at lower elevations and from 65 to 80 in the mountains. Winds will be south at 5 to 15 mph, except 10 to 20 mph at higher elevations. Minimum relative humidities will be from 15 to 25 percent.

Colorado and Utah will be partly to mostly cloudy with scattered showers and afternoon thunderstorms. High temperatures will be 65 to 80 in the mountains and in the 80's and 90's at lower elevations. The Utah deserts will be 100 to 105 degrees. Minimum relative humidities will be from 10 to 20 percent. Upslope and up valley winds will be 5 to 10 mph.
